DETAILED ACTION

Election Restriction

Applicants' election with traverse of group II, claims 1-15, 16-34 and 38, where "X" = N is acknowledged.

Applicants' argument that the search of the full scope of claims will not constitute unreasonable burden on the office is not found persuasive. Identity of "X" places compounds in various different classes. For example when X is Nitrogen the compounds are classified in 564+ and when "X" is Oxygen the compounds are classified in 560+. Restriction is made final.

Rejoinder

Claims 1-34 where X = nitrogen, are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(b), claims 35-37, directed to the process of making or using the allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because a claimed invention previously withdrawn from consideration under 37 CFR 1.142 has been rejoined, **the restriction requirement between groups II and IV as set forth in the Office action mailed on 4/24/06 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present

Art Unit: 1621

application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowance

Claims 1-34 are directed towards a novel compound. Prior art search failed to identify a reference that anticipates or suggests the compound of claims 1-34. The only references depicting the same type of compounds were the applicants' own publications which were published after the filing date of the provisional application. WO 99/65932 (WO99) constitutes closes art. Compounds in the said art bear limited structural similarity to the instantly claimed compounds. Although the compounds in WO99 have the aryl substituted alkyl substituents off of the core structure and the heteroatoms on the core are positioned in approximately the same positions, the difference between the prior art and the instant claims is considerable and there is no motivation to alter the invention of WO99 in a manner that would furnish the instantly claimed compounds. Some of the differences are: lack of double bond in WO99, different oxidation states of the heteroatoms that are attached to the core and extra amide groups present in WO99.

Conclusion

Claims 1-37 are allowed.

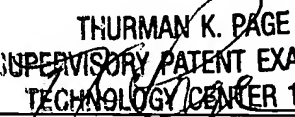

Claim 38 is canceled by applicant amendment.
